

Draft Community Rolling Action Plan (CoRAP), Rev.1 - 11 November 2011

This draft plan introduces 91 substances that are proposed for review by the Member States under the substance evaluation process of the REACH Regulation (EC) No 1907/2006 (Articles 44 to 48). The substances are tentatively divided for evaluation in years 2012, 2013 and 2014. At this stage it includes the non-confidential substance names, CAS- and EC-numbers. By publishing this draft ECHA wishes to inform the stakeholders of the progress made.

The draft plan contains substances for which there is a suspicion that their use could pose a risk to human health or the environment. Substance evaluation is the process under REACH that allows for clarification of such risks. Following the evaluation by Member States, further information may be requested from the registrants of the substances if additional data is considered necessary to clarify the suspected risk. Alternatively, it may be concluded that the substance does not constitute a risk and no further data is needed.

This draft plan has been prepared in close cooperation with the Member States, taking into account the criteria for selection of substances¹. The Member States have also proposed substances based on national priorities. In many cases the initial concerns are related to PBT²-properties, suspected endocrine disruption, or carcinogenic, mutagenic and reprotoxic properties in combination with wide dispersive use or consumer uses. In general, the uses of these substances cover various areas and are not focusing on any particular industrial, professional or consumer uses.

The draft plan has been submitted on 20 October 2011 to the Member States and the ECHA Member State Committee. The Committee will prepare an opinion on the draft CoRAP in February 2012. On the basis of the Committee's opinion ECHA will adopt the final CoRAP. The final CoRAP will indicate the Member State responsible for the evaluation and in broad terms the initial reasons of concern.

ECHA's aim is to adopt the final CoRAP by the end of February 2012 with the final CoRAP published on the ECHA website. From the publication of the final CoRAP, the respective Member States have one year to evaluate substances specified for 2012 and, where regarded as necessary, to prepare a draft decision for requesting further information to clarify the suspected risks. Such draft decisions will be reviewed and agreed by the other Member States, ECHA and, if proposals of amendments are made, by the Member State Committee before it becomes effective. Registrants of substances listed on the final CoRAP will be provided an opportunity to comment before any final decision to request further information will be taken.
