

Spyridon MERKOURAKIS

Spyridon Merkourakis is currently working in the Research Executive Agency, as coordinator of the Innovative Training Network's chemistry panel. He oversees the implementation of research projects and the evaluation of research proposals in chemistry.

He has worked for eight years in the European Chemicals Agency, as project manager for restriction proposals and authorisation applications. He has dealt with a variety of hazardous chemical substances, covering both human health and environmental endpoints. Under REACH, he has also worked in the early implementation of substance in articles requirements.

Prior to that, he was scientific officer in the European Commission's Joint Research Centre, in Spain, where he managed projects on environmentally-friendly technologies on various sectors (air, water, soil). He has experience with many legal instruments under EU law.

He has six years of laboratory experience as researcher in the field of chemistry and materials science.

He is a metallurgical engineer by training, holds a PhD in electrochemistry and a Master's degree in applied economics.
