

List of substances under investigation

It is important to note that the scope of the investigation is not limited to MCCPs as defined in the candidate list¹ but covers a broad range of substances containing 'chloroalkanes with carbon chain lengths within the range from C14 to C17'.

The substances listed below contain or may contain 'chloroalkanes with carbon chain lengths within the range from C14 to C17' in concentration above 0.1% and are therefore in the scope of our investigation.

Disclaimer:

The list of substances below is provided to facilitate the identification of substances that are currently under investigation within the scope of the restriction proposal. The list is intentionally broad, but not exhaustive, and does not pre-empt any conclusions on the scope of the restriction proposal.
