4.1.1 Use-specific instructions for use

Plot out a layout for the approximate placement of the dispensers before deploying them. The dispensers should be placed one unit in every 400-500 m³. Where obstacles or obstructions are present the dispensers can be placed to accommodate the layout and air dynamics the factory.

Keep the dispensers sealed in outer foil bag packaging until use.

The Dispensers should be positioned 2-3 metres above the floor and fastened securely.

Monitoring traps are recommended before, during and after treatment to assess adult moth populations as part of a pest management program.

Dispensers should be replaced every 3 months.

This product has a slow mode of action and is intended for long-term use. The product doesn't have an immediate effect on the population of the food moths (it may take more than 12 months). Control of food moths is achieved over a period of time with continuous use of the product.
