

# Revised Product Assessment Report (PAR) templates

Safer Chemicals Conference

6 October 2021

European Chemicals Agency

## What is the PAR template used for?

- When preparing the assessment of a single biocidal product or a biocidal product family for national, simplified or Union authorisation applications

## Advantages

No repetition of information in the PAR and in the Summary of Product Characteristics (SPC)

Pre-filled text to help compiling the template

Thorough revision of the content to better support assessment in all areas

## Which documents are published?

- PAR template for single biocidal product
- Confidential annex for single biocidal product
- PAR template for biocidal product family
- Confidential annex for biocidal product family
- Overview of physico-chemical tests
- Instructions for using the templates

## When to use them?

Mandatory, as of 4 December 2021

Voluntary, before 4 December 2021

## Where to find them?

- On ECHA's website at [ECHA](#) > [Support](#) > [Guidance](#) > [Formats and templates](#)

Thank you!
