

JOB DESCRIPTION:

The Seconded National Expert (SNE) will work in the Classification Unit in the Directorate Hazard Assessment. The SNE will take part in one or several of the activities listed below:

- Carrying out scientific/technical tasks related to the process of harmonised classification and labelling;
- Managing the proposals for harmonised classification and labelling, including liaison with submitting Member State Competent Authorities,
- Contributing to the (eco)toxicological assessment of groups of structurally similar substances under the integrated regulatory strategy, to decide on the need for regulatory risk management or the generation of further information;
- Contributing to scientific/technical activities of related REACH and CLP processes, in particular regulatory risk management;
- Carrying out scientific/technical tasks related to the further optimisation of standard operation procedures and IT tools applied during the substance or dossier evaluation processes.

REQUIREMENTS:

Education: Successful completion of a full course of university studies attested by a scientific degree in chemistry, engineering, (eco)toxicology, or environmental sciences where the normal duration of university education is three (3) or more years.

Experience:

- At least three (3) years of professional experience in chemicals hazard/risk assessment and/or management.
