

## **ECHA/TRN/2018/016 – Evaluation Units**

**The Evaluation Units** work in close cooperation, with all three Units conducting dossier evaluations (i.e. compliance checks and the examination of testing proposals) and managing substance evaluation. They ensure that the Agency is well prepared to carry out these activities by utilising the best possible scientific, technical and regulatory capacity and working in an efficient and transparent way. The Units also provide scientific and technical input to helpdesk activities, and to the development of guidance documents and scientific IT tools, within the scope of their competence.

In this professional and challenging setting we have opening for trainees with analytical skills and a pro-active attitudes.

### **Assignment**

In this traineeship you will have the unique possibility to work with tasks related to dossier evaluation or substance evaluation under REACH. In this role you will support the Evaluation Units in their daily activities. Depending on your experience and profile these tasks may include:

- Contribution to the assessment of physico-chemical, ecotoxicological and/or toxicological data in the registration dossiers;
- Contribution to the implementation of the extended one-generation reproductive toxicity information requirement in dossier evaluation;
- Contribution to the administrative support of the dossier evaluation work performed by ECHA;
- Contribution to the prioritisation of substances for evaluation (inclusion in the Community Rolling Action Plan);
- Contribution to the coordination and administrative support of the substance evaluation work performed by EU Member States;
- Support to the implementation and planning of the scientific and administrative IT tools supporting the evaluation processes;
- Contribution to extracting, collecting and presenting scientific information related to Knowledge Management.

### **Profile**

- Completed university degree in a science field related to the area of the REACH regulation (Chemistry, Biochemistry, Ecotoxicology, Toxicology, Environmental Sciences, etc.);
- Good analytical skills;
- Proactive attitude;
- An eye for detail;
- Goal-orientation;
- Good communication and interpersonal skills;
- Aptitude for team work;
- Good English skills both written and spoken (as this is the working language of the Agency).

**Starting Date:** 01 September 2018

**Duration:** 6 months

**Deadline for applications:** 27 May 2018 at midnight 24:00 Helsinki time (23:00 p.m. CET)
