All EU countries*

Data as of: 30/05/2018

Overall Summary

REACH registrations by companies from 1st June 2008 (excluding NONS)

Number of new registration numbers granted by ECHA following submission of a registration dossier and substances related to these registrations.

	# Registrations	# Unique Substances
TOTAL	27 389	9 736

Detailed Registration Statistics

The following tables are based on Overall Summary data, new registrations under REACH (NONS are excluded). Percentages are from total DL2018 values.

Breakdown by Registration Type

Three different types of registrations can be done under REACH: Full registration (Article 10), registration as an on-site isolated intermediate (Article 17) and registration as a transported isolated intermediate (Article 18). In one registration dossier any combination of one up to three different types can be covered. This is why the numbers below do not add up to the total number of registrations. Percentages are from total DL2018 values.

	# Registrations	%	# Substances
registered as full registration	21 296	77%	6 282
registered as intermediate	6 203	23%	4 228
<i>Transported isolated intermediates</i>	4 725		3 065
<i>On-site isolated intermediates</i>	1,653		1,492

Registration Statistics deadline 2018

Estonia

Data as of: 29/05/2018

Overall Summary

Table 1: REACH dossiers (registrations by companies from 1st June 2008 - NONS excluded)

(NONS are substances notified to Member State Competent Authorities under the previous European chemicals legislation - Directive 67/548/EEC)

The following table shows the total number of new registration numbers granted by ECHA following submission of a registration dossier.

Note that registrations resulting from notifications (NONS) made by companies under the previous chemicals legislation (Directive 67/548/EEC) are reported separately below in Table 2. The allocation of substances and dossiers across Tables 1 and 2 is described in detail in Table 3 at the end of this report.

	# Registrations	%	# Unique Substances	%
TOTAL	7	0.03%	7	0.07%

Detailed Registration Statistics

The following tables are based on Table 1 data, new registrations under REACH (ie. NONS are excluded).

Breakdown by Registration Type

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. This is why the numbers below do not add up to the total number of registrations.

	# Registrations	%	# Substances	%

Overall Summary

Table 1: REACH dossiers (registrations by companies from 1st June 2008 - NONS excluded)

(NONS are substances notified to Member State Competent Authorities under the previous European chemicals legislation - Directive 67/548/EEC)

The following table shows the total number of new registration numbers granted by ECHA following submission of a registration dossier.

Note that registrations resulting from notifications (NONS) made by companies under the previous chemicals legislation (Directive 67/548/EEC) are reported separately below in Table 2. The allocation of substances and dossiers across Tables 1 and 2 is described in detail in Table 3 at the end of this report.

Registration Statistics deadline 2018

Poland

Data as of: 29/05/2018

Overall Summary

Table 1: REACH dossiers (registrations by companies from 1st June 2008 - NONS excluded)

(NONS are substances notified to Member State Competent Authorities under the previous European chemicals legislation - Directive 67/548/EEC)

The following table shows the total number of new registration numbers granted by ECHA following submission of a registration dossier.

Note that registrations resulting from notifications (NONS) made by companies under the previous chemicals legislation (Directive 67/548/EEC) are reported separately below in Table 2. The allocation of substances and dossiers across Tables 1 and 2 is described in detail in Table 3 at the end of this report.

	# Registrations	%	# Unique Substances	%
TOTAL	261	0.95%	189	1.94%

Detailed Registration Statistics

The following tables are based on Table 1 data, new registrations under REACH (ie. NONS are excluded).

Breakdown by Registration Type

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. This is why the numbers below do not add up to the total number of registrations.

	# Registrations	%	# Substances	%
registered as full registration	235	1.10%	163	2.59%
registered as intermediate	26	0.42%	26	0.61%
<i>Transported isolated intermediates</i>	23	0.49%	23	0.75%
<i>On-site isolated intermediates</i>	3	0.18%	3	0.20%

Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals.

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

	# Registrations	%	# Substances	%
