

Metals and Inorganics Sectoral Approach list of substances

This list includes the substances provided by participating consortia as part of the Metals and Inorganics Sectoral Approach (MISA).

MISA is a voluntary programme that is endorsed by metals and inorganics consortia by signing a framework for cooperation. The agreement includes a rolling action plan for 2018-2020, which aims to identify, by the end of 2020, any outstanding REACH and CLP standard information endpoints, as well as further information, supply chain communication or risk management needs, where relevant.
