## Outcome from break-out group 1

### **Likes:**

- tiered approach
- H-codes breakdown
- Icons for concerns
- Approach for C&L and Uses

### **Room for improvement:**

- Inconsistencies in info card (self-classified subst.)
- Disclaimer link missing in info card
- Titles in in the info card in bold
- Printing functionalities
- Do not use “such as”
- More precise standard sentences

## Outcome from break-out group 1 (cont.)

### **Wish list:**

- Disclaimer in info card: where data comes from?
- Mouse on pictograms (explanations)
- Printing all names
- Search & results in different languages
- Search PBTness & other non CLH
- Info from other EU legislation (WFD, ROSH, POPs, EU OELs)
- Link to OECD chemportal
- Total amount of info available (disclosed and not-disclosed)
- Full history of updates
- Uses advised against
- Link to name of registrants
- SVHC uses in consumers articles
- Consistent method to remove outliers

## Outcome from break-out group 1 (cont.)

### **Debate points:**

- Info card for non registered substances?
- Info on C&L on info card & brief profiles (legal basis?)
- Remove info on dossier evaluation?

## Outcome from break-out group 2

### **Recommendations:**

- ECHA to communicate about the process to registrants, applicants and notifiers
- Link to further information
- Clarify the scope  
e.g. data not validated
- Further work needed on uses  
e.g. authorised uses, SIA
- Finding ways to minimise misleading communications on Data
