

Congratulations!

You've taken the lead to register a chemical under REACH. Remember that your job continues.

Thousands of smaller, inexperienced companies will register their chemicals by 31 May 2018. Some of them may join your registration. Please welcome the newcomers to the SIEF, and make sure they become part of the joint registration as the law requires.

The newcomers will cover their share of the cost for the joint registration. However, you need to make sure that this is done in a fair, transparent and non-discriminatory way.

We wish you a successful 2017!
