

Remember 2008?

The year of the Beijing Olympics and the financial crisis? In 2008, you said that you were dealing with chemicals and planning to register them in Europe. Well, your deadline is now approaching. In fact, you need to register your low-volume chemicals with ECHA by **31 May 2018** to continue legally on the EU/EEA market.

The good news is that we are here to help you! Have a look at our step-by-step advice in 23 EU languages at: **echa.europa.eu/reach-2018**.

We will contact you again before Easter to know more about your plans for registration.

In the meantime, have a successful 2017!
