*Coming soon*
New communication - Industry
The diagram represents the relations between the current case or asset and other cases and assets.

Squares represent cases while circles represent assets. Inside squares and circles you may find the case/asset numbers. Above the numbers you may find the case type for cases or the originating case type for assets.

The current case/asset square/circle is highlighted by default in the diagram. Clicking on any other square or circle will open in a new tab the corresponding case or asset details.

The arrows in the diagram are solid when the target of the relation is an asset, while they are dotted when the target of the relation is a case.

If a circle with an asset number does not contain any case type inside it means that the asset is migrated without any associated originating case type.

If a circle's border is dotted it means that this asset is a family member and it is shown in the diagram because it is the context asset of a case (in the case details diagram) or the causing asset (in the asset details diagram).

If the label of a circle (asset) is not bold then that means that the current user does not have access to the asset details page of that asset (due to the asset being transferred).

Making biocides data available

• Improved biocides dissemination pages available by end of 2018
  ✓ Extended search functionalities (e.g. by hazards and uses, Review Programme substances, Annex I substances)
  ✓ More detail on biocidal products (dedicated detailed pages)
  ✓ Preview of Summary of Product Characteristics (web SPC)
  ✓ Access to current and historical data on previous lifecycles of active substance approvals and products authorisations (initial applications and subsequent renewal data)
  ✓ Biocidal product comparison
Biocidal product extended search

- Product trade names
- Authorisation holder
- Authorisation type
- C&L data (hazards)
- Product uses
  - Field of use
  - User category
  - Target organisms
  - Application method
Biocidal product factsheet

- Comprehensive overview of product details
- Authorisation details
- Assessment history
Product comparison

Compare up to five products based on:

- Product uses
  - Product-type
  - Target organisms
- Field of use
  - User category
  - Application method
- Active substances
- Hazard statements

Disinfection By-Products

echa.europa.eu 14
Upcoming for 2017–2018

• Vol I Identity, PhysChem, analytical methodology
  ❖ Parts B+C to be added to Part A

• Vol II Efficacy
  ❖ Part A to be brought in line with Parts B+C
  ❖ B+C PT5 updated following ECHA disinfectants project
  ❖ B+C PT8 new appendix on “Annex A of EN-599”

• Vol III Human Health
  ❖ New section “Livestock exposure” (ARTFood Project 1)
  ❖ New section “Dietary risk/non-professional users” (ARTFood Project 2)

• Vol IV Environment
  ❖ Add guidance on Part B on BPs, add Part C and add SoC
To be started this year

• Vol II Efficacy
  ❖ B+C PT11, 12 and 19 updates

• Vol IV Environment
  ❖ Update to address flagged issues from currently ongoing update

• Vol V Technical equivalence
  ❖ Update following experience since first published in 2013
  ❖ Consultation to start in 2018 for publication in 2019
