

REACH Registration statistics

All Countries *

Data as of: 31/12/2020

* EEA (EU27, Norway, Iceland and Liechtenstein) + UK.

Overall Summary

REACH registrations by companies from 1st June 2008

The following table shows the currently valid registrations granted by ECHA following the submission of a registration dossier or due to the existence of a NONS notification.

	# Registrations	# Substances	# Companies
Registrations	101 981	23 316	15 810

Detailed Registration Statistics

Notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. They may be claimed (ECHA is aware of the current details of the company) or not. They also may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which have not been updated are reported separately.

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. This is why the numbers below do not add up to the total number of registrations.

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	75 897	12 732	14 968
registered as intermediate	19 221	9 535	2 616
<i>Transported isolated intermediates</i>	14 702	6 924	2 418
<i>On-site isolated intermediates</i>	5 602	4 078	818
NONS Notifications	7 950	4 472	-
<i>of which have been claimed</i>	3 211	2 505	568

Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

Breakdown by Joint Submission role	# Registrations	# Substances	# Companies
Registrations in Joint Submissions	89 133	16 435	15 435

REACH Registration statistics

Denmark

Data as of: 31/12/2020

Overall Summary

REACH registrations by companies from 1st June 2008

The following table shows the currently valid registrations granted by ECHA following the submission of a registration dossier or due to the existence of a NONS notification.

	# Registrations	# Substances	# Companies
Registrations	685	530	132

Detailed Registration Statistics

Notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. They may be claimed (ECHA is aware of the current details of the company) or not. They also may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which have not been updated are reported separately.

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. This is why the numbers below do not add up to the total number of registrations.

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	457	321	127
registered as intermediate	119	118	13
<i>Transported isolated intermediates</i>	77	76	11
<i>On-site isolated intermediates</i>	56	56	6
NONS Notifications	113	101	-
<i>of which have been claimed</i>	16	15	9

Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

Registrations	1 953	941	641

Detailed Registration Statistics

Notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. They may be claimed (ECHA is aware of the current details of the company) or not. They also may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which have not been updated are reported separately.

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. This is why the numbers below do not add up to the total number of registrations.

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	1 684	743	630
registered as intermediate	281	246	56
<i>Transported isolated intermediates</i>	189	172	51
<i>On-site isolated intermediates</i>	129	115	21
NONS Notifications	7	7	-
<i>of which have been claimed</i>	6	6	6

Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).
