Interratox Wurfbeutel
Desintec Brodex Paste
Strong Paste
MS Rodetox Brodi Paste

1.2. Authorisation holder

Name and address of the authorisation holder	Name	BELGAGRI SA
	Address	Rue des Tuiliers, 1 4480 Engis Belgium
Authorisation number	DE-0004701-14	
R4BP 3 asset reference number	DE-0004701-0000	
Date of the authorisation	26/05/2014	
Expiry date of the authorisation	31/08/2020	

1.3. Manufacturer(s) of the biocidal products

Name of the manufacturer	Company CGB (Compagnie Générale des Biocides)
Address of the manufacturer	Parc d'Activités des 4 Routes 35390 Grand Fougeray France
Location of manufacturing sites	Parc d'Activités des 4 Routes 35390 Grand Fougeray France

1.4. Manufacturer(s) of the active substance(s)

Active substance	11 - Brodifacoum
Name of the manufacturer	PelGar International Ltd
Address of the manufacturer	Unit 13, Newman Lane, Industrial Estate, Alton, Hampshire GU34 2QR Hants United Kingdom
Location of manufacturing sites	Unit 13, Newman Lane, Industrial Estate, Alton, Hampshire GU34 2QR Hants United Kingdom

2. Product composition and formulation

2.1. Qualitative and quantitative information on the composition of the biocidal product

Common name	IUPAC name	Function	CAS number	EC number	Content (%)
Brodifacoum		Active Substance	56073-10-0	259-980-5	0.004

2.2. Type of formulation

RB - Bait (ready for use)

3. Hazard and precautionary statements

Hazard statements

Precautionary statements

Keep out of reach of children.
Read label before use.
Keep away from food, drink and animal feedingstuffs.
Do not get in eyes, on skin, or on clothing.
Do not eat, drink or smoke when using this product.
Avoid release to the environment.

Wear protective gloves.

IF SWALLOWED: Immediately call a POISON CENTER.

Store in a closed container.

Store locked up.

Dispose of contents to in accordance with national regulations.

4. Authorised use(s)

4.1 Use description

Use 1 - Brodifacoum paste use

Product type	PT14 - Rodenticides (Pest control)
Where relevant, an exact description of the authorised use	A ready-to-use paste bait containing Brodifacoum (0.004% w/w) for use as a rodenticide for the control of rats and mice indoors and outdoors around buildings (for professional and amateur users) and in open areas and waste dumps (for professionals only) for the protection of public health, stored products and materials
Target organism(s) (including development stage)	Rattus norvegicus-Brown rat-Adults and juveniles Mus musculus-House mouse-Adults and juveniles
Field(s) of use	Indoor Outdoor
Application method(s)	Bait application - Indoors and outdoors (around buildings) Also for professionals only: Outdoors (open areas and waste dumps) Rats: Secure 60g of baits in covered tamper resistant baiting stations or covered bait points spaced 10m apart (5m apart in areas of high infestation) in areas where rats are active. Regularly check bait consumption and replace consumed or spoilt bait until consumption has stopped. Repeat treatment in situations where there is evidence of new infestation (e.g. fresh tracks or droppings). Mice: Secure 10g bait in covered tamper resistant baiting stations or covered bait points spaced 5m apart (3m apart in high infestation areas) in areas where mice are active. Regularly check bait consumption and replace consumed or spoilt bait until consumption has stopped. Repeat treatment in situations where there is evidence of new infestation (e.g. fresh tracks or droppings).
Application rate(s) and frequencies	Rats: 60g. Mice: 10g - 1 - Repeat treatment in situations where there is evidence of new infestation (e.g. fresh tracks or droppings).

Category(ies) of users

Trained professional
Professional
General public (non-professional)

Pack sizes and packaging material

Box - Paper, cardboard - 10g, 20g, 50g, 60g, 100g, 120g, 200g, 240g, 250g, 480g, 500g, 520g, 720g, 750g, 1Kg, 2Kg, 3kg, 5kg, 10kg, 15kg, 20kg or 25kg
Bag /Sack - PE - 200g, 240g, 250g, 500g
Bucket - PP or PE - 1kg, 2kg, 2.5kg, 3kg, 4kg, 5kg, 10kg, 15kg, 20kg or 25kg

/

4.1.5 Where specific to the use, the conditions of storage and shelf-life of the product under normal conditions of storage

/

5. General directions for use

5.1. Instructions for use

Instructions for the safe handling and use of the product:

Always read the label before use and follow the instructions provided.

Product must be handled in a safe manner.

Avoid all unnecessary exposure, in particular avoid ingestion.

Baits must be securely deposited in baiting stations or other coverings so as to minimise the risk of consumption by companion animals, other non-target animals and children. Where possible, secure baits so that they cannot be dragged away.

Dead rodent bodies, remains of unused bait or any fragments of bait found away from the bait station must be collected during all control operations to minimize the risk of consumption and poisoning to children, companion animals and other non-target animals.

Wash hands and face after application and use of the product, and before eating, drinking or smoking.

It is illegal to use this product for the intentional poisoning of non-target, beneficial and protected animals.

Specific Instructions for Professionals/Trained Professionals:

A thorough survey of the infested area is essential, particularly in secluded and sheltered places, to determine the extent of the infestation.

PUBLIC AREA USE: When the product is being used in public areas and tamper-resistant bait stations are not used, the following must be implemented. When the product is being used in public areas, the areas treated must be marked during the treatment period and a notice explaining the risk of primary or secondary poisoning by the anticoagulant as well as indicating the first measures to be taken in case of poisoning must be made available alongside the baits. When tamper-resistant bait stations are used, they should be clearly marked to show that they contain rodenticides and that they should not be disturbed.

OPEN AREAS/WASTE DUMPS: Where treatments to control rodents in open areas or waste dumps are considered appropriate, the professional user should fully justify the treatments and should undertake a local area assessment of the risk of primary and secondary exposure of humans, particularly vulnerable groups, and non-target organisms, especially protected and/or companion animals to the rodenticide bait.

Application in waste dumps and open areas must be carried out in bait stations or other coverings with the bait secured. The product must not be applied directly in to the soil, i.e. in rat holes.

Wash hands and face after application and use of the product, and before eating, drinking or smoking.

For professional users the use of appropriate personal protective equipment (PPE) is advised.

Addition safety Information:

To avoid risks to human health and the environment, comply with the instructions for use. Harmful to wildlife. Use bait containers clearly marked "poison" at all surface baiting points. Remove all remains of bait, dead rodents during and after treatment and dispose of safely. Apply only in positions inaccessible to children and pets.

5.2. Risk mitigation measures

Resistance Information

The resistance status of the rodent population to Brodifacoum should be taken into account when considering the choice of rodenticide to be used. Where resistance to Brodifacoum has been shown or is suspected, resistant management strategies should be employed by professionals/trained professionals. For non-professionals when in doubt or where the baiting measures are unsuccessful, consult a professional pest control operator.

5.3. Particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

Particulars of adverse effects:

The active substance in the form of baits may be palatable to humans and non-target species in sufficient quantity to produce toxic effects. Effects result from the inhibition of blood coagulation as Brodifacoum interacts with vitamin K1. Poisoning symptoms may include: bruising easily, nose or gum bleeds, blood in stools or urine, excessive bleeding from minor cuts or abrasions. Note that poisoning symptoms may develop over the course of several days.

FIRST AID

General note: In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible)

Inhalation: Not applicable

Oral: In case of ingestion or if swallowed seek medical advice immediately.

Eyes: In case of contact with eyes, remove contact lenses if present and rinse the eye slowly and gently with water for 15-20 minutes.

Seek medical advice immediately.

Dermal: The use of gloves is advised for hand protection (for Professional only). In case of contact with skin, wash with soap and water. Remove and launder any contaminated clothing.

Note to Physician:

Antidote – Vitamin K1 – under medical supervision.

POISON INFORMATION

For information or to report a poisoning incident contact The National Poisons Information Centre, Beaumont Hospital, Dublin (01-8092166), retain the label for reference. The product contains an aversive agent (Bitrex™) to prevent ingestion. The product contains a coloured dye to prevent consumption by non-target organisms, specifically birds

5.4. Instructions for safe disposal of the product and its packaging

Directions for the safe disposal

This material and its container must be disposed of safely. Dispose of packaging, remains of unused product and dead rodents in accordance with local regulations. If required, consult a professional waste operator or local authority.

5.5. Conditions of storage and shelf-life of the product under normal conditions of storage

Storage Instructions

Store in a cool, dry, well-ventilated place. Store locked up in the original container tightly closed.

Storage stability:

The shelf-life of the product is considered stable for two years at ambient temperatures. Use by the expiry date shown on the pack.
