

ECHA will have seven sessions at SETAC Europe in Helsinki, 26–30 May 2019

We are now looking for abstracts, presentations and posters to be shown on the different topics that we will present during the conference. If you have, for example, case studies about the following topics that you would like to get visibility for through us, let us know and submit your abstract to SETAC before **28 November 2018**.

ECHA's sessions are:

- Track 1. Ecotoxicology and human toxicology: from molecules to organisms, from omics to in vivo
 - Alternative approaches to animal testing for ecotoxicity assessments: exploring new and novel approaches
- Track 3. Environmental chemistry and exposure assessment: analysis, monitoring, fate and modelling
 - 3.12 Improvements in environmental exposure assessment: Development and application of tools across industry sectors, regulatory agencies, and international boundaries
- Track 4. Ecological risk assessment and human health risk assessment of chemicals, mixtures and stressors and risk mitigation strategies
 - State-of-the-art approaches, latest developments and future needs in regulatory risk assessment of biocides and veterinary medicines
 - Difficult to test substances: challenges in testing, interpretation of data and fulfilling information requirements under different regulations
 - Effect modelling for regulatory risk assessment: current applications and future directions
- Track 6. Environmental policy, risk management, and risk communication
 - Experiences with the guidance for identifying endocrine disruptors - learnings and potential needs for further development of assessment
 - Safe by Design: responsible and innovative research for safe and sustainable chemistry

And a session, not chaired by ECHA, on a complementary topic:

- Challenges and opportunities for advancing alternatives assessment and chemical substitution

For more information, read the descriptions of the parallel sessions [here](#) and call for abstracts [here](#).

Contributions from scientists, authorities, industry and other stakeholders are welcome.

We are looking forward to seeing you in Helsinki in May 2019.
