With reference to R4BP 3 communication no. NRN-C-1699335-82-00/F dated 7 December 2023, concerning the expiry date for the biocidal product Alphachloralose Grain, NO-2019-0181.

Decision

The Norwegian Environment Agency hereby grants LODI S.A.S. a postponement of the expiry date for the authorisation for the biocidal product Alphachloralose Grain on the Norwegian market. The expiry date is postponed from 31 December 2023 to 31 December 2024.

The product is mutual recognised in Norway under the terms and conditions as described in the final Norwegian Summary Product Characteristic (SPC) attached to the R4BP3 asset case no. NO-0021984-0000. The final SPC can also be found on the website of the European Chemicals Agency here: [Information on biocides - ECHA \(europa.eu\)](https://echa.europa.eu/information-on-biocides).

The grant of extension of expiry date is given in accordance with Article 5 of Regulation (EU) No 492/2014 (renewal of authorisations of biocidal products).

Background

Regulation (EU) No. 528/2012 (the Biocidal Products Regulation, BPR), is implemented in Norwegian law through the Norwegian Biocide Regulation of 18 April 2017 No. 480.

The reference Member State for the renewal of the biocidal product, France, have extended the authorisation for Alphachloralose Grain until 31 December 2033. For authorisations that are mutual recognised, it is agreed among the Member States that these authorisations shall have the same expiry date as the national authorisation granted by the reference Member State (c.f. CA-Sept14-Doc.5.7 –Final).

The current expiry date for the Norwegian authorisation is 31 December 2023.
