Overall Summary

Table 1: REACH dossiers (registrations by companies from 1st June 2008 - NONS excluded)

(NONs are substances notified to Member State Competent Authorities under the previous European chemicals legislation - Directive 67/548/EEC)
The following table shows the total number of new registration numbers granted by ECHA following submission of a registration dossier.
Note that registrations resulting from notifications (NONs) made by companies under the previous chemicals legislation (Directive 67/548/EEC) are reported separately below in Table 2. The allocation of substances and dossiers across Tables 1 and 2 is described in detail in Table 3 at the end of this report.

	# Registrations	# Unique Substances
TOTAL	51 465	11 173
phase-in	47 409	9 572
non phase-in	4 056	1 601

Table 2: Notified substances (NONs, notified to Member State Competent Authorities under the previous European chemicals legislation - Directive 67/548/EEC)

Substances notified under Directive 67/548/EEC (NONs) prior to the introduction of REACH are considered as registered. The table below shows (a) the number of NONs which were granted a registration number by ECHA (b) the number of these claimed by the notifier and (c) the number for which an update has been submitted under REACH.

	# Registrations	# Unique Substances
(a) Number of NONs Notifications	9 963	5 293
(b) of which have been claimed	5 210	3 798
(c) of which have been updated under REACH	1 870	1 591

Detailed Registration Statistics

The following tables are based on Table 1 data, new registrations under REACH (ie. NONs are excluded).

Breakdown by Registration Type

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. This is why the numbers below do not add up to the total number of registrations.

	# Registrations	# Substances
registered as full registration	41 047	6 787
registered as intermediate	11 214	5 667
<i>Transported isolated intermediates</i>	8 267	4 093
<i>On-site isolated intermediates</i>	3 764	2 517

Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

	# Registrations	# Substances

Technical Notes

Table 3: Substance phase-in/non phase-in status and NONS allocation

At the registration level phase-in/non phase-in status is derived by the status indicated by the company in the registration dossier. At the substance level, substances appear in Tables 1 and 2 according to (i) the existence of a new registration under REACH (Table 1) and (ii) the existence of a notification (NONS) under the former chemicals legislation (Table 2), thus there are some duplicate entries at the substance level.

However, the presence of an updated NONS dossier (Table 2 (c)) takes priority and removes the substance from Table 1

Due to the fact that a substance can be phase-in or non phase-in depending on the specific market situation for an individual company, we have reported substances with this 'dual' status as phase-in substances.

For an explanation on EC and List numbers, refer to the ECHA website reading our "Important Note on EC Numbers and List Numbers", using the link below:

<http://echa.europa.eu/web/guest/information-on-chemicals/registered-substances>

EC Number	Source	Phase-in / Non phase-in status
2xx-xxx-x	EINECS (European Inventory of Existing Commercial chemical Substances) List	Always Phase-in (Table 1)
3xx-xxx-x	EINECS (European Inventory of Existing Commercial chemical Substances) List	Always Phase-in (Table 1)
4xx-xxx-x	ELINCS (European List of Notified Chemical Substances) List	Substances appear in Tables 1 and 2 according to (i) the existence of a new registration under REACH (Table 1) and (ii) the existence of a notification (NONS) under the former chemicals legislation (Table 2), thus there can be duplicate entries. However, the presence of NONs dossier which has been updated under REACH (Table 2 (c)) takes priority and removes the substance from Table 1.
5xx-xxx-x	NLP (No-Longer Polymers) List	Phase-in if one or more registrant(s) has declared the substance as phase-in. Indicated in Table 1 as non-phase in only in the case that all registrants have indicated a non phase-in status in their registration dossiers

List Number	Source	Phase-in / Non phase-in status
6xx-xxx-x	Automatically assigned to substances identified only with a CAS No.	Phase-in if one or more registrant(s) has declared the substance as phase-in. Indicated in Table 1 as non-phase in only in the case that all registrants have indicated a non-phase in status in their registration dossiers. Additionally, priority is given to phase-in allocation for pre-registered substances.
7xx-xxx-x	Assigned to substances after inquiries by the ECHA Substance ID Team	Phase-in if one or more registrant(s) has declared the substance as phase-in. Indicated in Table 1 as non phase-in only in the case that all registrants have indicated a non phase-in status in their registration dossiers
8xx-xxx-x	Automatically assigned to substances identified only with a CAS No. (continuation of the 6xx-xxx-x series)	Phase-in if one or more registrant(s) has declared the substance as phase-in. Indicated in Table 1 as non-phase in only in the case that all registrants have indicated a non-phase in status in their registration dossiers. Additionally, priority is given to phase-in allocation for pre-registered substances.
9xx-xxx-x	Automatically assigned, e.g. to pre-registrations without a CAS No. or other numerical identifier	Phase-in if one or more registrant(s) has declared the substance as phase-in. Indicated in Table 1 as non phase-in only in the case that all registrants have indicated a non phase-in status in their registration dossiers. Additionally, priority is given to phase-in allocation for pre-registered substances.

Detailed Registration Statistics

The following tables are based on Table 1 data, new registrations under REACH (ie. NONS are excluded).

Breakdown by Registration Type

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. This is why the numbers below do not add up to the total number of registrations.

	# Registrations	% of EEA	# Substances	% of EEA
registered as full registration	630	1.53%	349	5.14%
registered as intermediate	260	2.32%	241	4.25%
<i>Transported isolated intermediates</i>	212	2.56%	195	4.76%
<i>On-site isolated intermediates</i>	62	1.65%	62	2.46%

Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals.

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

	# Registrations	% of EEA	# Substances	% of EEA

Overall Summary

Table 1: REACH dossiers (registrations by companies from 1st June 2008 - NONS excluded)

(NONS are substances notified to Member State Competent Authorities under the previous European chemicals legislation - Directive 67/548/EEC)
The following table shows the total number of new registration numbers granted by ECHA following submission of a registration dossier.
Note that registrations resulting from notifications (NONS) made by companies under the previous chemicals legislation (Directive 67/548/EEC) are reported separately below in Table 2. The allocation of substances and dossiers across Tables 1 and 2 is described in detail in Table 3 at the end of this report.

Table 2: Notified substances (NONS, notified to Member State Competent Authorities under the previous European chemicals legislation - Directive 67/548/EEC)

Substances notified under Directive 67/548/EEC (NONS) prior to the introduction of REACH are considered as registered. The table below shows (a) the number of NONS which were granted a registration number by ECHA (b) the number of these claimed by the notifier and (c) the number for which an update has been submitted under REACH.

	# Registrations	% of EEA	# Unique Substances	% of EEA

Detailed Registration Statistics

The following tables are based on Table 1 data, new registrations under REACH (ie. NONS are excluded).

Breakdown by Registration Type

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. This is why the numbers below do not add up to the total number of registrations.

	# Registrations	% of EEA	# Substances	% of EEA
registered as full registration	5 480	13.35%	2 009	29.60%

<i>Transported isolated intermediates</i>	641	7.75%	504	12.31%
<i>On-site isolated intermediates</i>	245	6.51%	221	8.78%

Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals.

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

	# Registrations	% of EEA	# Substances	% of EEA

The following tables are based on Table 1 data, new registrations under REACH (ie. NONS are excluded).

Breakdown by Registration Type

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. This is why the numbers below do not add up to the total number of registrations.

	# Registrations	% of EEA	# Substances	% of EEA
