5. General directions for use

5.1. Instructions for use

The product is a bait paste provided in a bait box that kills ants in the house and on terraces. The product contains attractive bait combined with the active ingredient, which is collected by the ants and transported into their nests. The uptake of the bait is improved by removing other food sources in the vicinity of the bait box.

- The product is packed in two different bait box designs, a thermoformed station and a screw-top station. In order to open the thermoformed bait box, the bait box must be broken from its attachment. Thereby entrances to the bait box will be opened. In order to open the screw-top bait box the top part of the station must be screwed to the left as far as it will go.
 - Place the bait station in an area that is protected from moisture and rainfall and near the nest or ant trail.
 - Apply the product away from direct sunlight or heat sources (e.g. do not place it under a radiator).
 - Apply bait box on hard surfaces only.
 - No or only a few dead ants will be visible because the product does not start to act until it has entered the ant nest.

Place the station in the area of infestation for at least eight to fourteen days. Remove the product when ants are no longer visible . Replace the bait box if it is empty and ants are still visible. To close the screw-top station, the top part of the station must be screwed to the right as far as it will go.

5.2. Risk mitigation measures

- The product must be protected from moisture and rainfall.
 - The product and its residues, empty containers or packaging must not enter drains, nor surface water.
 - Avoid any unnecessary contact with the product. Misuse may cause harm to health. Keep away from children and pets.
 - Avoid any direct or indirect contact with food, feed and drinks.
 - Do not use force when opening the bait stations.
 - Dispose of product residues in the original packaging or empty bait stations at a collection point for household chemicals.
- Dispose of folding carton at a collection point for recyclable materials.

Do not re-use original packaging or empty containers.

5.3. Particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

Particulars of likely direct or indirect effects: None known when the product is used properly according to the product label.
First aid instructions:
