

Community rolling action plan update covering the years 2023, 2024 and 2025

The Community rolling action plan (CoRAP) update for the years 2023 – 2025 lists 24 substances suspected of posing a risk to human health or the environment, for evaluation by 12 Member State Competent Authorities, under the substance evaluation process of the REACH Regulation (EC) No 1907/2006 (Articles 44 to 48). The plan contains 6 newly allocated substances and 18 substances already included in the previous CoRAP 2022-2024 update, published on 22 March 2022. For 16 out of these 18 substances, the evaluation year has been postponed, mainly to await submission of new information requested under dossier evaluation.

Out of the 24 substances to be evaluated, 6 are to be evaluated in 2023, 9 in 2024 and 9 in 2025. However, for substances listed for years 2024 and 2025, changes can be introduced in the next CoRAP update in 2024.

The remaining 5 substances of the 27 substances listed in the previous CoRAP 2022-2024 update are withdrawn from CoRAP. For 3 of these substances, the data are already considered sufficient to clarify the initial concerns, while for 2, relevant information has been requested under dossier evaluation processes. These substances can be placed in the CoRAP list again, if after the conclusion of these processes, concerns would remain beyond what can be clarified through dossier evaluation.

The CoRAP update has been prepared in close cooperation with the Member States, taking into account the criteria for selection of substances¹. A draft CoRAP was submitted on 30 November 2022 to the Member States and to the Member State Committee (MSC) for its opinion and published on the ECHA website on 13 December 2022. ECHA adopted the CoRAP update based on the opinion of the MSC, which was adopted on 7 February 2023, and published on 21 March 2023 on its website.

Further information

A description of the substance evaluation process and CoRAP is available on ECHA's website².

In the CoRAP update, the grounds for the initial concern, which triggered selection of substances for evaluation, are briefly described. Detailed justifications for inclusion of substances in CoRAP are provided in the justification documents available in the dynamic table published on the ECHA website³.

In the CoRAP, the contact information of the Member State Competent Authority is provided for each substance to facilitate interaction of registrants with evaluating authorities. ECHA encourages such interaction, to clarify any concerns related to the substances in question⁴. While this applies to all substances on the CoRAP, it is particularly relevant for substances to be evaluated in 2023.

⁶ Dossier evaluation ongoing or needed, and the process needs to be completed before initiating substance evaluation. Substance evaluation not expected to start by 2025.

⁷ Dossier evaluation process to be completed before initiating substance evaluation. The substance may be put in CoRAP again, if after conclusion of the dossier evaluation process, concerns would remain, beyond what can be clarified through dossier evaluation.

⁸ Data generated under dossier evaluation or other publicly available information sufficiently address and clarify the initial concern(s)
