Proposal for Harmonised Classification and Labelling of Citral; 3,7-dimethylacta-2,6-dienal (CAS no 5392-40-5)

The European Environmental and Contact Dermatitis Research Group (EECDRG) is a scientific group founded in 1984 and focussing on various aspects of contact dermatitis, with 21 members from 13 countries.

Based on existing experimental data and strong clinical data on the skin sensitising properties of citral we want to express our support to the Danish proposition to give citral the harmonised classification as a skin sensitiser in Category 1A.

on behalf of the EECDRG,

Kristiina Aalto-Korte, EECDRG Chair

Members taking part in the decision to give this supporting comment:

Prof. Tove Agner, Department of Dermatology, University of Copenhagen, Faculty of Health Sciences
Bispebjerg Hospital 2400 Copenhagen NV Denmark
