

## Community rolling action plan update covering the years 2021, 2022 and 2023

The Community rolling action plan (CoRAP) update for the years 2021 – 2023 lists 58 substances for evaluation by the Member State competent authorities under the substance evaluation process of the REACH Regulation (EC) No 1907/2006 (Articles 44 to 48). The plan contains three newly allocated substances and 55 substances already published in the previous CoRAP update on 18 March 2020. The substances are distributed for evaluation in years 2021, 2022 and 2023 between 16 Member States. In 2021, eight substances are to be evaluated by six Member States. In 2022 and 2023, it is planned to evaluate 40 and 10 substances, respectively. However, changes may be introduced for the substances listed for years 2022 and 2023 in the next CoRAP update in March 2022.

The CoRAP update has been prepared in close cooperation with the Member States, taking into account the criteria for selection of substances<sup>1</sup>. A draft CoRAP was submitted on 4 November 2020 to the Member States and to the Member State Committee (MSC) for its opinion. The draft CoRAP was published on the ECHA website on 8 December 2020. ECHA adopted the updated CoRAP on the basis of the opinion of the MSC taken on 10 February 2021 and published it on 17 March 2021 on its website.

Comparing this CoRAP update 2021-2023 to the previous CoRAP update, the year of evaluation is postponed for 28 substances. The main reason was awaiting results from ongoing dossier evaluation processes on the same substances. In some cases, the postponing was done to align the timing for similar substances in order to achieve higher consistency between assessments.

Five of the substances were withdrawn upon requests of the evaluating Member State as, based on new information or changes of circumstances, clarifying a concern by Substance evaluation is currently seen as of low priority or unnecessary.

The withdrawn substances are:

- 204-500-1 Perhydro-1,3,5-trinitro-1,3,5-triazine
- 220-260-0 Octahydro-1,3,5,7-tetranitro-1,3,5,7-tetrazocine
- 253-057-0 2,2-dimethylpropan-1-ol, tribromo derivative
- 200-657-5 3,5-dimethylpyrazole
- 701-241-0 Reaction Products of C3 alcohols and C3 alkenes obtained as by-products from the manufacture of propan-2-ol by hydration of propylene

## Further information

A description of the substance evaluation process and CoRAP is available on ECHA's website<sup>2</sup>.

In the CoRAP update the grounds for the initial concern that triggered the selection of substances for evaluation are briefly described. The concerns per substance are explained in more detail in the related justification documents available in the dynamic table published on ECHA website<sup>3</sup>.

In the CoRAP the contact information of the Member State competent authority is provided for each substance to facilitate interaction of registrants with evaluating authorities. ECHA encourages such interaction in order to clarify any concerns related to the substances in question<sup>4</sup>. While this applies to all substances on the CoRAP, it is particularly relevant for substances to be evaluated in 2021.
