

Addendum to Product Assessment Report

Eimermacher Iodine Compounds NL_SCH

March 2024

Addendum to biocidal product assessment report related
to product authorisation under Regulation (EU) 528/2012

Contents

Background..... 1

Decision..... 2

Background

An application for a minor/major change was received concerning the addition of the following pack sizes for storage of the products within the Eimermacher Iodine Compounds NL_SCH BPF:

| |
|---|
| 10 Litres HDPE bottle (all Metas) |
| 60 Litres HDPE jar (all Metas) |
| 60 Litres HDPE canister for milking robot (all Metas) |

Decision

The packaging material high density polyethylene (HDPE) of the additional pack sizes applied for in this minor change was already assessed in the original dossier. No unacceptable weight loss of the product nor reactivity to the package material or damage was observed after storage. Therefore, the minor change can be granted and the pack sizes can be added to the PAR of the Eimermacher Iodine Compounds NL_SCH BPF.
