Summary of product characteristics for a biocidal product

Product name: TERMIGARD

Product type(s): PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)

Authorisation number: IT/2019/00592/MRP

R4BP 3 asset reference number: IT-0014973-0000

Administrative information

1.1. Trade names of the product

TERMIGARD			

1.2. Authorisation holder

1.2. Addionation noide				
Name and address of the	Name	QUIMICA DE MUNGUIA S.A.		
authorisation holder	Address	DERIO BIDEA 51 48100 MUNGUIA Spain		
Authorisation number	IT/2019/00592/MRP			
R4BP 3 asset reference number	IT-0014973-0000			
Date of the authorisation	23/10/2019			
Expiry date of the authorisation	26/03/2029			

1.3. Manufacturer(s) of the biocidal products

Name of the manufacturer	QUÍMICA DE MUNGUÍA, S. A.	
Address of the manufacturer	Derio Bidea, 51 48100 Munguía Spain	
Location of manufacturing sites	Derio Bidea, 51 48100 Munguía Spain	

1.4. Manufacturer(s) of the active substance(s)

Active substance	62 - diflubenzuron
Name of the manufacturer	Chemtura Manufacturing Netherlands B.V.
Address of the manufacturer	Ankerweg 18 1041 AT Amsterdam Netherlands
Location of manufacturing sites	Confidential information Confidential information Confidential information Netherlands

2. Product composition and formulation

2.1. Qualitative and quantitative information on the composition of the biocidal product

Common name	IUPAC name	Function	CAS number	EC number	Content (%)
diflubenzuron	1-(4-chlorophenyl)-3-(2,6-difluorobenzoyl)urea	Active Substance	35367-38-5	252-529-3	0,25
CELLULOSE			9004-34-6	232-674-9	99,75

2.2. Type of formulation

RB - Bait (ready for use)

3. Hazard and precautionary statements

Hazard statements	Very toxic to aquatic life. Very toxic to aquatic life with long lasting effects.		
Precautionary statements	If medical advice is needed, have product container or label at hand.		
	Keep out of reach of children.		
	Read carefully and follow all instructions.		
	Avoid release to the environment.		
	Collect spillage.		
	Dispose of container to local/national regulations.		

4. Authorised use(s)

4.1 Use description

Use 1 - Insecticide against subterranean termites

Product type

PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)

Where relevant, an exact description of the authorised use

Bait system for termite control. Use only by professionals for treatment of underground termites in soils, foundations and walls.

Target organism(s) (including development stage)

Scientific name: Reticulitermes sp. Common name: Subterranean termites Development stage: Nymphs

Field(s) of use

Indoor

Outdoor

Bait system for termite control. Use only by professionals for treatment of underground termites in soils, foundations and walls.

Application method(s)

Bait application -

The application pattern of TERMIGARD (both indoors and outdoors) comprises different stages:

- Stage 1: Survey. In order to obtain the maximum performance of the product is necessary to know with the maximum accuracy where the termites are identifing their pathways. This step is performed with precision equipment.
- Stage 2: Testing placement. Once termite's pathway are identified, it is required to place a testing piede of cellulose (moistened cardboard or a piece of wood) in order to attract and check the level of infestation. The testing bait is intruduced into a bait station which is placed inside the soil in the surrounding of the building (outdoor use) or which is placed in the walls or floor inside the building in middle of termites pathway.
- Stage 3: Bait application. When the testing bait shows the presence of termites (the termites attack directly the cardborad or the piece of wood), the product is added replacing the testing bait. The TERMIGARD bait which is inside a plastic bag is placed into the bait station. The bag is drilled or cut in the bait station with a small punch or knife and the bait station is closed again, allowing the termites to enter through the small slits in the bait station or through the testing bait itself.

Application rate(s) and frequencies

50 g/plastic bag - 0 -

In the case of re-infestations repeat the procedure

Category(ies) of users

Professional

Pack sizes and packaging material

Sachet - Plastic: HDPE - 50 - 1000 g

4.1.1 Use-specific instructions for use

Dispose the baits on the bear-baits in direct contact with the attacked wood or in perforated tubes to introduce inside the ground, in order to reach all the colonies which may exist in your environment.

4.1.2 Use-specific risk mitigation measures

Before use the product, read carefully the label. In order to avoid risks for the people and the environment, follow the instructions of use. Do not use on foods nor utensils of kitchen. Do not use the product in presence of human and/or pets. Wear waterproof gloves.

4.1.3 Where specific to the use, the particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

Particulars of likely direct or indirect adverse effects:

Chemically stable. Avoid excessive heat and strong oxidizing agents.

First aid instructions:

Quickly remove the person from the contamined area.

Remove contaminated clothing.

Flush eves with plenty of water for at least 15 minutes.

Do not forget to remove the contact lenses. Wash skin with soap and water without rubbing.

Check the breathing, if neccesary, administer artificial respiration.

Bring intoxicated person into a hospital whenever possible, show the label or container to doctors.

Emergence measures to protect the environment:

Sweep up and place the product in its original container or other suitable container.

Entrust the contaminated products to a company approved for the destruction of hazardous product.

4.1.4 Where specific to the use, the instructions for safe disposal of the product and its packaging

Must be specially treated in compliance with official regulations.

Contaminated packaging can be emptied as far possible.

Remove the containers and packaging under current legislation.

4.1.5 Where specific to the use, the conditions of storage and shelf-life of the product under normal conditions of storage

Keep in the original recipients.

Store in a dry place in the shelter.

Keeps out of the reach of children.

5. General directions for use

5.1. Instructions for use

Dispose the baits on the bear-baits in direct contact with the attacked wood or in perforated tubes to introduce inside the ground, in order to reach all the colonies which may exist in your environment.

5.2. Risk mitigation measures

Before use the product, read carefully the label.

In order to avoid risks for the people and the environment, follow the instructions of use.

Do not use on foods nor utensils of kitchen.

Do not use the product in presence of human and/or pets.

Wear waterproof gloves.

5.3. Particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

Particulars of likely direct or indirect adverse effects:

Chemically stable. Avoid excessive heat and strong oxidizing agents.

First aid instructions:

Quickly remove the person from the contaminated area.

Remove contaminated clothing.

Flush eyes with plenty of water for at least 15 minutes.

Do not forget to remove the contact lenses. wash skin with soap and water without rubbing.

Check the greathing, if neccesary, administer artificial respiration.

Bring intoxicated person into a hospital whenever possible, show the label or container to doctors.

Emergence measures to protect the environment:

Sweep up and place the product in its original container or other suitable container.

Entrust the contaminated products to a company approved for the destruction of hazardous product.

5.4. Instructions for safe disposal of the product and its packaging

The product must be specially treated in compliance with official regulations.

Contaminated packaging can be emptied as far possible.

Remove the containers and packaging under current regulations.

5.5. Conditions of storage and shelf-life of the product under normal conditions of storage

Keep in the original recipents.

Store in a dry place in the shelter.

Keep out of the reach children.
