

Summary of product characteristics for a biocidal product

Product name: 3A Mate

Product type(s): PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)

Authorisation number: FR-2016-0004

R4BP 3 asset reference number: FR-0002400-0000

Table Of Contents

Administrative information	1
1.1. Trade names of the product	1
1.2. Authorisation holder	1
1.3. Manufacturer(s) of the biocidal products	1
1.4. Manufacturer(s) of the active substance(s)	2
2. Product composition and formulation	2
2.1. Qualitative and quantitative information on the composition of the biocidal product	2
2.2. Type of formulation	3
3. Hazard and precautionary statements	3
4. Authorised use(s)	3
5. General directions for use	5
5.1. Instructions for use	5
5.2. Risk mitigation measures	6
5.3. Particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment	6
5.4. Instructions for safe disposal of the product and its packaging	6
5.5. Conditions of storage and shelf-life of the product under normal conditions of storage	6
6. Other information	7

Administrative information

1.1. Trade names of the product

3A MATE

1.2. Authorisation holder

Name and address of the authorisation holder	Name	CIN CELLIOSE
	Address	Rue de la Verrerie 69310 Pierre Bénite France
Authorisation number		FR-2016-0004
R4BP 3 asset reference number		FR-0002400-0000
Date of the authorisation		22/06/2016
Expiry date of the authorisation		21/06/2026

1.3. Manufacturer(s) of the biocidal products

Name of the manufacturer	CIN CELLIOSE
Address of the manufacturer	RUE DE LA VERRERIE BP 58 69310 PIERRE BENITE France
Location of manufacturing sites	10 BOULEVARD DU POITOU 49 300 CHOLET France
	31 AVENUE ROBERT SCHUMANN 69360 SAINT SYMPHORIEN D'OZON France

Name of the manufacturer	CIN VALENTINE SAU
Address of the manufacturer	RIERA SECA NUMERO 1 POLIGONO INDUSTRIAL CAN MILLANS 08110 MONTCADA I REIXAC BARCELONA Spain
Location of manufacturing sites	RIERA SECA NUMERO 1 POLIGONO INDUSTRIAL CAN MILLANS 08110 MONTCADA I REIXAC BARCELONA Spain

Name of the manufacturer	CIN CORPORACAO INDUSTRIAL DO NORTE SA
Address of the manufacturer	AVENIDA D. MENDO N°831 APARTADO 1008 4471-909 MAIA Portugal
Location of manufacturing sites	AVENIDA D. MENDO N°831 APARTADO 1008 4471-909 MAIA Portugal

1.4. Manufacturer(s) of the active substance(s)

Active substance	24 - deltamethrin
Name of the manufacturer	BAYER BAYER VAPI PRIVATED LIMITED
Address of the manufacturer	BAYER HOUSE CENTRAL AVENUE, HIRANANDANI GARDENS POWAI 400076 MUMBAI India
Location of manufacturing sites	PLOT 306/3, 2 PHASE, GIDC 396195 GUJARAT VAPI India

2. Product composition and formulation

2.1. Qualitative and quantitative information on the composition of the biocidal product

Common name	IUPAC name	Function	CAS number	EC number	Content (%)
deltamethrin	(S)-a-cyano-3-phenoxybenzyl (1R,3R)-3-(2,2-dibromovinyl)-2,2-dimethylcyclopropane carboxylate	Active Substance	52918-63-5	258-256-6	0,75

2.2. Type of formulation

PA (Paste): water-based, film-forming composition

3. Hazard and precautionary statements

Hazard statements

Very toxic to aquatic life.

Very toxic to aquatic life with long lasting effects.

Contains 2-octyl-2H-isothiazol-3-one, 1,2-benzisothiazol-3(2H)-one and 5-chloro-2-methyl-4-isothiazolin-3-one and 2-methyl-2H-isothiazolin-3-one (3:1). May produce an allergic reaction.

Precautionary statements

Avoid release to the environment.

Collect spillage.

Dispose of contents to according to local /regional / national / international regulations.

4. Authorised use(s)

4.1 Use description

Use 1 - Professionals

Product type

PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)

Where relevant, an exact description of the authorised use

Ready-to-use insecticidal paint.

Target organism(s) (including development stage)

Scientific name: Dermatophagoides pteronyssinus
Common name: House dust mites
Development stage: mobile stages

Scientific name: Culex sp., Aedes sp. and Anopheles sp.
Common name: Mosquitoes
Development stage: Adults

Scientific name: Musca domestica
Common name: House fly
Development stage: Adults

Scientific name: Stomoxys calcitrans
Common name: Stable flies
Development stage: Adults

Field(s) of use	<p>Indoor</p> <p>The product is for indoor use on walls and ceilings. It can be used in industrial and commercial premises, in private and public areas and in equestrian centres and kennels.</p> <p>The product is not to be used in other breeding premises and on breeding and transportation equipment for domestic animals, nor on surfaces that could be in contact with food utensils, food and feed for human or animal consumption.</p> <p>The product is applied on indoor walls and ceilings to prevent infestation of mosquitoes and flies. The product also has an acaricidal efficacy and kills dust mites that could crawl on the treated surfaces. The aim of this product is not to control house dust mites infestations.</p>
Application method(s)	<p>Method: Painting Detailed description: Surface treatment : painting using a paintbrush or a roller.</p> <p>Do not spray.</p> <p>The product must be applied with a suitable sub-coat, or on existing adhesive matt paint.</p>
Application rate(s) and frequencies	<p>Application Rate: 100 g/m² Dilution (%): - Number and timing of application:</p> <p>100 g of the product per m² i.e. 1 L of the product for 14 m². Duration of the effect : 5 years</p>
Category(ies) of users	<p>Professional</p>
Pack sizes and packaging material	<p>3A MATE is supplied in 2.5 L and 10 L tin pails with crimp lids. The tin pails are varnished internally with an epoxy-phenolic varnish.</p>

4.1.1 Use-specific instructions for use

See directions for use

4.1.2 Use-specific risk mitigation measures

See directions for use

4.1.3 Where specific to the use, the particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

See directions for use

4.1.4 Where specific to the use, the instructions for safe disposal of the product and its packaging

See directions for use

4.1.5 Where specific to the use, the conditions of storage and shelf-life of the product under normal conditions of storage

See directions for use

5. General directions for use

5.1. Instructions for use

- Always read the label or leaflet before use and respect follow all the instructions provided.
- Adopt integrated pest management methods such as the combination of chemical, physical control methods and other public health measures, taking into account local specificities (climatic conditions, target species, conditions of use, etc).
- Alternate products containing active substances with different mode of action, (to remove resistant individuals from the population).
- The users should inform if the treatment is ineffective and report straightforward to the registration holder
- Do not use in premises where cats are housed, or where other animals with particular sensitivity to deltamethrin are housed.
- Do not use at the same time as a veterinary antiparasitic treatment containing a pyrethroid.
- Apply only during a fallowing period in animal shelters/housings (empty premises).
- Do not apply on surfaces likely to be licked by animals.
- Wait complete drying of the treated surfaces after the end of the treatment, before allowing animals to re-enter.
- Avoid contact with freshly painted surface.
- The product shall not be applied on surfaces likely to be in direct contact with food, feed or drinks
- Do not wash the contaminated material under tap water.
- An appropriate plastic sheet must protect the ground during application
- The applicator must wear a disposable protective equipment (gloves and protective clothing)
- Treated surfaces (walls and ceiling) must not be cleaned with water. If occasional washing occurs, do not drain off the washing water in the sewage disposal systems.
- Use an independent recovery system for contaminated waters and aqueous sludge from paint during the equipment cleaning.
- Do not discharge unused products, aqueous sludge from paint and rinsing waters, on the ground, into water courses, into pipes (sink, toilets...) nor down the drains.
- The product 3A MATE has an acaricidal effect, but is not intend to be used for control of house dust mites infestations. It has to be included in a set of pest management methods such as vaccuming, textile washing and use of products against house dust mites applied on textile.

5.2. Risk mitigation measures

-

5.3. Particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

If swallowed : rinse mouth with water. Do not induce vomiting. Call a poison center or a doctor/physician. Show him label, leaflet or product container.
 If inhaled : remove victim to fresh air and keep at rest, if experiencing respiratory symptoms, call a doctor/physician.
 If on skin : remove contaminated clothing. Rinse skin with plenty of water and soap. If necessary, call a doctor/physician.
 If in eyes : rinse with plenty of water for 10 minutes. Contact an ophtalmologist, especially in case of redness, pain, or blurred vision.
 Show him label, leaflet or product container.

5.4. Instructions for safe disposal of the product and its packaging

The contianer, paint residues, contaminated and not cleaned application material and/or washing water and aqueous sludge must be collected in an appropriate recovery system.

5.5. Conditions of storage and shelf-life of the product under normal conditions of storage

Shelf-life : 2 years

6. Other information

- The authorization holder has to report any observed resistance incidents to the Competent Authorities (CA) or other appointed bodies involved in resistance management
