Summary of product characteristics for a biocidal product

Product name: Anti-fourmis

Product type(s): PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)

PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)

PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)

Authorisation number: FR-0008940-0000

R4BP 3 asset reference number: FR-0008940-0000

#### 4.1.1 Use-specific instructions for use

Do not apply the product on absorbing surfaces.

#### 4.1.2 Use-specific risk mitigation measures

When used indoor, ensure the product is applied in sheltered areas (cracks and crevices) or apply only in areas not subject to wet cleaning.

#### 4.1.3 Where specific to the use, the particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment
4.1.4 Where specific to the use, the instructions for safe disposal of the product and its packaging

During application, remove excess of gel product with absorbent paper

4.1.5 Where specific to the use, the conditions of storage and shelf-life of the product under normal conditions of storage

None

4.2 Use description

Use 2 - GENERAL PUBLIC

Product type

PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)

Where relevant, an exact description of the authorised use

None

Target organism(s) (including development stage)

Formicinae:-Garden ant-Adults

Field(s) of use

Indoor

Indoor

Application method(s)

Bait application -
The bait boxes are deposited on the ant paths in building.

Application rate(s) and frequencies

Bait boxes of 4.9 g: depending on the location and the infestation - 0 - several bait boxes need to be placed along the ant’s paths. Place at least 1 bait box per 10 m² (in case of heavy infestations up to 3 bait boxes per 10 m²) for at least 3 weeks. Check weekly if ants are still present and in case of heavy infestation (indoors and outdoors) replace the old bait box with a new one after 3-4 weeks. Frequency of the treatment: once in a month. Period of time needed for the biocidal effect: 3 days after ingestion.

Category(ies) of users

General public (non-professional)

Pack sizes and packaging material

Baitbox - Plastic: HDPE - 4.9g
4.2.1 Use-specific instructions for use

Do not force open the bait boxes and do not damage them, even when empty.

4.2.2 Use-specific risk mitigation measures

When used indoor, ensure the product is applied in sheltered areas (cracks and crevices) or apply only in areas not subject to wet cleaning.

4.2.3 Where specific to the use, the particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

None

4.2.4 Where specific to the use, the instructions for safe disposal of the product and its packaging

Do not clean bait boxes with water between treatments.

4.2.5 Where specific to the use, the conditions of storage and shelf-life of the product under normal conditions of storage

None

4.3 Use description

Use 3 - GENERAL PUBLIC

Product type

PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)

Where relevant, an exact description of the authorised use

None

Target organism(s) (including development stage)

Formicinae:-Garden ant-Adults

Field(s) of use

Outdoor

Outdoor

Application method(s)

Bait application - The bait boxes are deposited on the ant paths or near to the nest entrances around buildings.
Application rate(s) and frequencies
Bait boxes of 4.9 g: depending on the location and the infestation - 0 - several bait boxes need to be placed along the ant’s paths and/or in the vicinity of the nest(s). Place at least 1 bait box per 10 m² (in case of heavy infestations up to 3 bait boxes per 10 m²) for at least 3 weeks. For outdoor applications use 1 bait box per ant nest entrance. Check weekly if ants are still present and in case of heavy infestation (indoors and outdoors) replace the old bait box with a new one after 3-4 weeks. Frequency of the treatment: once in a month. Period of time needed for the biocidal effect: 3 days after ingestion.

Category(ies) of users
General public (non-professional)

Pack sizes and packaging material
Baitbox - Plastic: HDPE - 4.9g

4.3.1 Use-specific instructions for use
Do not force open the bait boxes and do not damage them, even when empty. When used outdoor, use only bait boxes.

4.3.2 Use-specific risk mitigation measures
Apply only in areas that are not liable to submersion or becoming wet, i.e. protected from rain, floods and cleaning water.

4.3.3 Where specific to the use, the particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment
None

4.3.4 Where specific to the use, the instructions for safe disposal of the product and its packaging
Do not clean bait boxes with water between treatments.

4.3.5 Where specific to the use, the conditions of storage and shelf-life of the product under normal conditions of storage
None

5. General directions for use
5.1. Instructions for use

Always read the label or leaflet before use and respect all the instructions provided. Respect the recommended application doses. Inform the authorisation holder if the treatment is ineffective. Apply strict hygiene measures: do not eat, drink or smoke during handling of the product and wash hands after use of the product.

5.2. Risk mitigation measures

Do not apply in areas accessible to children, pets or other non-target animals in order to minimize the risk of poisoning. The product should not be applied or disposed in the vicinity of food or feed.

5.3. Particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

<table>
<thead>
<tr>
<th>Skin contact:</th>
<th>In case of skin contact: Wash off with soap and plenty of water.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Eye contact:</td>
<td>In case of eye contact: Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.</td>
</tr>
<tr>
<td>Ingestion If:</td>
<td>if swallowed: Clean mouth with water and drink afterwards plenty of water. Seek medical advice.</td>
</tr>
</tbody>
</table>

5.4. Instructions for safe disposal of the product and its packaging

Dispose of unused product, its packaging and all other waste (i.e. dead insects) in accordance with local regulations. Do not discharge unused product on the ground, into water courses, into pipes (sink, toilets…) nor down the drains.

5.5. Conditions of storage and shelf-life of the product under normal conditions of storage

Keep out of the reach of children. The product could be conserved 4 years since the manufacturing date.

6. Other information

In case of ineffective treatment (suspected resistance), the competent authority shall be informed by the authorisation holder.
