### **5. General directions for use**

#### **5.1. Instructions for use**

Place bait station on an even surface near ant nests, trails or where ants access the room.  
For Pavillion station: Remove the centre protective transparent lid then activate the unit by pressing down firmly on the top of the capsule in the bait station. Place the bait station in an area that is protected from moisture.  
For UFO/Triangle stations: Activate the unit by pressing down firmly on the top round button of the bait station.  
For Chamber station: To activate the bait station simply break the exposed tab and remove from the side of the ant bait.  
For Ant Bait Mini station: Activate the unit by holding it firmly and using scissors to cut off the raised nipple on the top of the bait station or alternatively, if there is no nipple, simply remove the top label. Then rinse scissors clean.  
For Ant Bait Blister: To activate, squeeze capsule until gel has moved to the next compartment.  
Apply the product away from direct sunlight or heat sources (e.g. do not place it under a radiator).  
The product should not be re-used or recycled.

### Resistance management

The following phrases must appear on the label:

- In the case of reduced efficacy or suspected development of resistance discontinue use. The user is advised to contact a professional pest control operator.

The following phrases are for information only:

- Treatments should be recommended to be combined with non-chemical measures if possible.
- Always read the label or leaflet before use and respect all the instructions provided.
- Complete elimination of target insects should be attempted in infested areas.
- Take into account the life cycle and characteristics of target insects. Target the most susceptible stages in the pest life cycle.
- Alternative treatments with products with different modes of action.
- Resistance should be monitored on a continuous basis. Users should inform the authorisation holder if the treatment is ineffective.
