

Helsinki, 21 June 2022

#### Addressees

Registrants of RECONSILE RM of Sulphur Silan as listed in Appendix 3 of this decision

Date of submission of the dossier subject to this decision 16/06/2021

### Registered substance subject to this decision ("the Substance")

Substance name: Polysulfides, bis[3-(triethoxysilyl)propyl]

EC number: 915-673-4

Decision number: Please refer to the REACH-IT message which delivered this

communication (in format TPE-D-XXXXXXXXXXXXXXX/F)

# **DECISION ON TESTING PROPOSAL(S)**

Based on Article 40 of Regulation (EC) No 1907/2006 (REACH), you must submit the information listed below by **27 March 2024**.

Requested information must be generated using the Substance unless otherwise specified.

### Information required from all the Registrants subject to Annex IX of REACH

- 1. Sub-chronic toxicity study (90-day) (Annex IX, Section 8.6.2.; test method: OECD TG 408) by oral route, in rats. The study must include the following to investigate the kidney function after administration of the Substance:
  - urinalysis (for specifications see OECD TG 408, para. 37); and
  - $\bullet$  histopathological examination of the kidneys of all male animals in all dose groups with an additional immunohistochemical staining for alpha-2µ globulin.

The reasons for the decision(s) are explained in Appendix 1.

#### Information required depends on your tonnage band

You must provide the information listed above for all REACH Annexes applicable to you in accordance with Articles 10(a) and 12(1) of REACH. The addressees of the decision and their corresponding information requirements based on registered tonnage band are listed in Appendix 3.

You are only required to share the costs of information that you must submit to fulfil your information requirements.

### How to comply with your information requirements

To comply with your information requirements, you must submit the information requested by this decision in an updated registration dossier by the deadline indicated above. You must also **update the chemical safety report, where relevant**, including any changes to classification and labelling, based on the newly generated information.

You must follow the general requirements for testing and reporting new tests under

REACH, see Appendix 4.

# **Appeal**

This decision, when adopted under Article 51 of REACH, may be appealed to the Board of Appeal of ECHA within three months of its notification to you. Please refer to <a href="http://echa.europa.eu/regulations/appeals">http://echa.europa.eu/regulations/appeals</a> for further information.

# Failure to comply

If you do not comply with the information required by this decision by the deadline indicated above, ECHA will notify the enforcement authorities of your Member State.

Authorised<sup>1</sup> under the authority of Mike Rasenberg, Director of Hazard Assessment

Appendix 1: Reasons for the decision

Appendix 2: Procedure

Appendix 3: Addressees of the decision and their individual information requirements

Appendix 4: Conducting and reporting new tests under REACH

<sup>&</sup>lt;sup>1</sup> As this is an electronic document, it is not physically signed. This communication has been approved according to ECHA's internal decision-approval process.

# Appendix 1: Reasons for the decision

# **Contents**

Reasons for the decision(s) related to the information under Annex IX of REACH				
1.	Sub-chronic toxicity study (90-days)			
Ref	ferences	. 5		

# Reasons for the decision(s) related to the information under Annex IX of REACH

## 1. Sub-chronic toxicity study (90-days)

- A sub-chronic toxicity study (90 day) is an information requirement under Annex IX to REACH (Section 8.6.2.).
  - 1.1. Information provided to fulfil the information requirement
- 2 You have submitted a testing proposal for a Sub-chronic toxicity study (90 day) according to OECD TG 408 with the Substance.
- 3 ECHA requested your considerations for alternative methods to fulfil the information requirement for Repeated dose toxicity. You provided your considerations concluding that there were no alternative methods which could be used to adapt the information requirement(s) for which testing is proposed. ECHA has taken these considerations into account.
- 4 ECHA agrees that a 90-day study is necessary.
  - 1.2. Specification of the study design
- You proposed testing in the rat. ECHA agrees with your proposal because the rat is the preferred species according to the OECD TG 408. Therefore, the study must be conducted in the rat.
- You proposed testing by the oral route. ECHA agrees with your proposal because this route of administration is appropriate to investigate systemic toxicity; Guidance on IRs and CSA, Section R.7.5.4.3.2.
- In addition, the OECD TG 407 study (2000) with the Substance shows adverse effects in the kidneys of male rats: increased kidney weights, basophilic renal tubules and an increase in acidophilic bodies and hyaline droplets. This indicates that the kidney is a target organ of the Substance.
- The study concluded that 'these appeared to be alpha 2u-globulin-type effects'. Alpha-2µ-globulin-mediated nephropathy may occur in male rats. Since this mode of action is not considered relevant to humans, the involvement of alpha-2µ-globulin in the kidney effects is a key parameter for establishing the relevance of the kidney effects for human risk assessment.
- 9 Therefore, the study must include the following to investigate the kidney function after administration of the Substance:
  - urinalysis (for specifications see OECD TG 408, para. 37); and
  - histopathological examination of the kidneys of all male animals in all dose groups with an additional immunohistochemical staining for alpha-2µ globulin.

#### 1.3. Outcome

10 Under Article 40(3)(b) your testing proposal is accepted under modified conditions, and you are requested to conduct the test with the Substance, as specified above.

# **Appendix 2: Procedure**

ECHA started the testing proposal evaluation in accordance with Article 40(1) on 13 September 2021.

ECHA held a third party consultation for the testing proposal(s) from 21 October 2021 until 7 December 2021. ECHA did not receive information from third parties.

ECHA followed the procedure detailed in Articles 50 and 51 of REACH.

ECHA notified you of the draft decision and invited you to provide comments.

ECHA did not receive any comments within the commenting period.

ECHA notified the draft decision to the competent authorities of the Member States for proposals for amendment.

As no amendments were proposed, ECHA adopted the decision under Article 51(3) of REACH.

# Appendix 3: Addressees of this decision and their corresponding information requirements

In accordance with Articles 10(a) and 12(1) of REACH, the information requirements for individual registrations are defined as follows:

- the information specified in Annexes VII, VIII and IX to REACH, for registration at 100-1000 tpa;
- the information specified in Annexes VII to X to REACH, for registration at more than 1000 tpa.

Registrant Name	Registration number	Highest REACH Annex applicable to you

Where applicable, the name of a third party representative (TPR) may be displayed in the list of recipients whereas ECHA will send the decision to the actual registrant.

## Appendix 4: Conducting and reporting new tests for REACH purposes

# 1. Requirements when conducting and reporting new tests for REACH purposes

## 1.1. Test methods, GLP requirements and reporting

- (1) Under Article 13(3) of REACH, all new data generated as a result of this decision must be conducted according to the test methods laid down in a European Commission Regulation or to international test methods recognised by the Commission or ECHA as being appropriate.
- (2) Under Article 13(4) of REACH, ecotoxicological and toxicological tests and analyses must be carried out according to the GLP principles (Directive 2004/10/EC) or other international standards recognised by the Commission or ECHA.
- (3) Under Article 10(a)(vi) and (vii) of REACH, all new data generated as a result of this decision must be reported as study summaries, or as robust study summaries, if required under Annex I of REACH. See ECHA Practical Guide on How to report robust study summaries<sup>2</sup>.
- (4) Under the introductory part of Annexes VII/VIII/IX/X to REACH, where a test method offers flexibility in the study design, for example in relation to the choice of dose levels or concentrations, the chosen study design must ensure that the data generated are adequate for hazard identification and risk assessment.

#### 1.2. Test material

Before generating new data, you must agree within the joint submission on the chemical composition of the material to be tested (Test Material) which must be relevant for all the registrants of the Substance.

- (1) Selection of the Test material(s)
  - The Test Material used to generate the new data must be selected taking into account the following:
    - the variation in compositions reported by all members of the joint submission,
    - the boundary composition(s) of the Substance,
    - the impact of each constituent/ impurity on the test results for the endpoint to be assessed. For example, if a constituent/ impurity of the Substance is known to have an impact on (eco)toxicity, the selected Test Material must contain that constituent/ impurity.
- (2) Information on the Test Material needed in the updated dossier
  - You must report the composition of the Test Material selected for each study, under the "Test material information" section, for each respective endpoint study record in IUCLID.
  - The reported composition must include all constituents of each Test Material and their concentration values and other parameters relevant for the property to be tested.

This information is needed to assess whether the Test Material is relevant for the Substance and whether it is suitable for use by all members of the joint submission.

Technical instructions on how to report the above is available in the manual on How to prepare registration and PPORD dossiers<sup>3</sup>.
