

## REACH Registration statistics

### All Countries \*

Data as of: 30/04/2024

\* EEA (EU27, Norway, Iceland and Liechtenstein) + UK(NI)

#### Overall Summary

#### REACH registrations by companies from 1st June 2008

The following table shows the currently valid registrations granted by ECHA following the submission of a registration dossier or due to the existence of a NONS notification.

	# Registrations	# Substances	# Companies
Registrations	106 071	22 684	17 574

#### Detailed Registration Statistics

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. Therefore the numbers below do not add up to the total number of registrations. Furthermore, notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. However, those NONS which were not claimed by any company by the deadline of 17/07/2022, were revoked by ECHA and they are not reported in these tables. NONS that were claimed, may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which were claimed but not yet updated, are reported separately, while NONS notifications which were claimed and updated are reported either under "registered as full registration" or "registered as intermediate".

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	83 569	13 226	16 712
registered as intermediate	20 971	10 198	2 758
<i>Transported isolated intermediates</i>	16 362	7 545	2 574
<i>On-site isolated intermediates</i>	5 771	4 226	810
NONS Notifications (claimed but not updated)	2 725	2 211	477

#### Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

Breakdown by Joint Submission role	# Registrations	# Substances	# Companies
Registrations in Joint Submissions	98 843	17 725	17 262
<i>Lead</i>	18 574	N/A	N/A
<i>Member</i>	80 269	N/A	N/A

	# Registrations	# Substances	# Companies
Registrations	1 813	1 232	345

#### Detailed Registration Statistics

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. Therefore the numbers below do not add up to the total number of registrations. Furthermore, notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. However, those NONS which were not claimed by any company by the deadline of 17/07/2022, were revoked by ECHA and they are not reported in these tables. NONS that were claimed, may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which were claimed but not yet updated, are reported separately, while NONS notifications which were claimed and updated are reported either under "registered as full registration" or "registered as intermediate".

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	1 356	819	338
registered as intermediate	466	439	44
<i>Transported isolated intermediates</i>	395	373	41
<i>On-site isolated intermediates</i>	90	90	20
NONS Notifications (claimed but not updated)	7	7	4

#### Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. Therefore the numbers below do not add up to the total number of registrations. Furthermore, notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. However, those NONS which were not claimed by any company by the deadline of 17/07/2022, were revoked by ECHA and they are not reported in these tables. NONS that were claimed, may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which were claimed but not yet updated, are reported separately, while NONS notifications which were claimed and updated are reported either under "registered as full registration" or "registered as intermediate".

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	26	17	9
registered as intermediate	1	1	1
<i>Transported isolated intermediates</i>	1	1	1
<i>On-site isolated intermediates</i>	1	1	1
NONS Notifications (claimed but not updated)	0	0	0

#### Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

## REACH Registration statistics

### Norway

Data as of: 30/04/2024

#### Overall Summary

##### REACH registrations by companies from 1st June 2008

The following table shows the currently valid registrations granted by ECHA following the submission of a registration dossier or due to the existence of a NONS notification.

	# Registrations	# Substances	# Companies
Registrations	526	336	117

#### Detailed Registration Statistics

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. Therefore the numbers below do not add up to the total number of registrations. Furthermore, notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. However, those NONS which were not claimed by any company by the deadline of 17/07/2022, were revoked by ECHA and they are not reported in these tables. NONS that were claimed, may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which were claimed but not yet updated, are reported separately, while NONS notifications which were claimed and updated are reported either under "registered as full registration" or "registered as intermediate".

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	429	261	113
registered as intermediate	81	72	22
<i>Transported isolated intermediates</i>	59	56	18
<i>On-site isolated intermediates</i>	26	24	10
NONS Notifications (claimed but not updated)	19	19	3

#### Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

Breakdown by Joint Submission role	# Registrations	# Substances	# Companies
Registrations in Joint Submissions	498	309	116

## REACH Registration statistics

### Sweden

Data as of: 30/04/2024

#### Overall Summary

##### REACH registrations by companies from 1st June 2008

The following table shows the currently valid registrations granted by ECHA following the submission of a registration dossier or due to the existence of a NONS notification.

	# Registrations	# Substances	# Companies
Registrations	3 191	2 002	571

#### Detailed Registration Statistics

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. Therefore the numbers below do not add up to the total number of registrations. Furthermore, notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. However, those NONS which were not claimed by any company by the deadline of 17/07/2022, were revoked by ECHA and they are not reported in these tables. NONS that were claimed, may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which were claimed but not yet updated, are reported separately, while NONS notifications which were claimed and updated are reported either under "registered as full registration" or "registered as intermediate".

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	2 696	1 671	524
registered as intermediate	496	403	124
<i>Transported isolated intermediates</i>	395	319	121
<i>On-site isolated intermediates</i>	136	110	25
NONS Notifications (claimed but not updated)	9	9	7

#### Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

## REACH Registration statistics

### United Kingdom (Northern Ireland)

Data as of: 30/04/2024

#### Overall Summary

##### REACH registrations by companies from 1st June 2008

The following table shows the currently valid registrations granted by ECHA following the submission of a registration dossier or due to the existence of a NONS notification.

	# Registrations	# Substances	# Companies
Registrations	82	77	16

#### Detailed Registration Statistics

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. Therefore the numbers below do not add up to the total number of registrations. Furthermore, notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. However, those NONS which were not claimed by any company by the deadline of 17/07/2022, were revoked by ECHA and they are not reported in these tables. NONS that were claimed, may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which were claimed but not yet updated, are reported separately, while NONS notifications which were claimed and updated are reported either under "registered as full registration" or "registered as intermediate".

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	68	63	15
registered as intermediate	15	15	3
<i>Transported isolated intermediates</i>	11	11	3
<i>On-site isolated intermediates</i>	13	13	1
NONS Notifications (claimed but not updated)	0	0	0

#### Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

Breakdown by Joint Submission role	# Registrations	# Substances	# Companies
Registrations in Joint Submissions	82	77	16
<i>Lead</i>	6	N/A	N/A
<i>Member</i>	76	N/A	N/A
Individual Registrations	0	0	0
NONS Notifications (claimed but not updated)	0	0	0
TOTAL	82	-	-

Breakdown by Registrant Company Size	# Registrations	# Substances	# Companies
Registered by Large company	67	65	12
Registered by SME	15	15	4
<i>Medium company</i>	2	2	1
<i>Small company</i>	4	4	2
<i>Micro company</i>	9	9	1
TOTAL	82	-	-

Breakdown by Role in Supply Chain	# Registrations	# Substances	# Companies
Importer	47	42	10
Manufacturer	33	33	5
Only Representative of a non-EU manufacturer	2	2	2
NONS Notifications (claimed but not updated)	0	0	0
TOTAL	82	-	-

Breakdown by Tonnage Band	# Registrations	# Substances	# Companies
>1000t	28	28	7
100-1000t	9	9	3
10-100t	11	11	7
1-10t	20	20	8
Intermediate only	14	14	2
NONS Notifications (claimed but not updated)	0	0	0
TOTAL	82	-	-
